

**IN THE CLAIMS:**

Claims 1-10 (Canceled).

Claim 11 (Currently Amended): A liquid crystal display panel, comprising:  
first and second substrates; and  
a liquid crystal layer between the first and second substrates, wherein the liquid  
crystal layer has a photopolymerized monomer aligned perpendicular to the first and  
second substrates,  
wherein the liquid crystal layer includes a bistable nematic liquid crystal layer.

Claim 12 (Original): The liquid crystal display panel of claim 11, further comprising first  
and second electrodes on the first and second substrates, respectively.

Claim 13 (Original): The liquid crystal display panel of claim 12, wherein the first and  
second electrodes are selected from a group consisting of indium tin oxide (ITO) and  
indium zinc oxide (IZO).

Claim 14 (Canceled).

Claim 15 (Original): The liquid crystal display panel of claim 11, wherein the liquid  
crystal layer contains a chiral dopant.

Claim 16 (Original): The liquid crystal display panel of claim 11, wherein the liquid crystal layer contains at least one polymer network.

Claim 17 (Canceled).
